**Subject:** Meeting today with WESTLAKE

Dear Dr. Meiburg,

Thank you again for the meeting this morning.

Wendell Tinsley from Houston will not be going in to all the conflicts with PolyOne wanting to withhold data and information from the report.

Wendell will be leading the Westlake group, which includes Kevin Sheridan from the plant in Calvert City, both of whom you've met. Westlake's three science consultants -- Dr. Cooper, Dr. West and Dr. Kagel -- will also be there.

Our goal is to move on, build a wall, do corrective action. We need your help, Stan, to stop the stalling of the other party, plus make sure the report doesn't compromise the knowledge and information well known about the site. Local leaders are concerned that the report contain all of the historical data and findings.

As always we appreciate the help of your team.

Gratefully,

Bob Babbage  
--public affairs advisor to Westlake
